Independent Accountants' Review Report

To the Board of Directors and Management of HCA Healthcare, Inc.

We have reviewed HCA Healthcare, Inc.'s Schedule of Scope 1 and Scope 2 Location-Based Greenhouse Gas Emissions (the Subject Matter) included in Appendix A for the year ended December 31, 2020, in accordance with the World Resources Institute/World Business Council for Sustainable Development's *The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard, Revised Edition* (the Criteria). HCA Healthcare, Inc.'s management is responsible for the Subject Matter included in Appendix A in accordance with the Criteria. Our responsibility is to express a conclusion on the Subject Matter based on our review.

Our review was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants (AICPA) AT-C Section 105, *Concepts Common to All Attestation Engagements*, and AT-C Section 210, *Review Engagements*. Those standards require that we plan and perform our review to obtain limited assurance about whether any material modifications should be made to the Subject Matter in order for it to be in accordance with the Criteria. A review consists principally of applying analytical procedures; making inquiries of persons responsible for the subject matter; obtaining an understanding of the data management systems and processes used to generate, aggregate and report the Subject Matter; and performing such other procedures as we considered necessary in the circumstances. A review is substantially less in scope than an examination, the objective of which is to obtain reasonable assurance about whether the Subject Matter is in accordance with the Criteria, in all material respects, in order to express an opinion. Accordingly, we do not express such an opinion. A review also does not provide assurance that we became aware of all significant matters that would be disclosed in an examination. We believe that our review provides a reasonable basis for our conclusion.

In performing our review, we have also complied with the independence and other ethical requirements set forth in the Code of Professional Conduct and applied the Statements on Quality Control Standards established by the AICPA.

As described in the notes accompanying the schedule in Appendix A, the Subject Matter is subject to measurement uncertainties resulting from limitations inherent in the nature of and the methods used for determining such data. The selection of different but acceptable measurement techniques can result in materially different measurements. The precision of different measurement techniques may also vary.

The information included in HCA Healthcare, Inc.'s Impact Report, other than the Subject Matter, has not been subjected to the procedures applied in our review, and accordingly, we express no conclusion on it.

Based on our review, we are not aware of any material modifications that should be made to the Schedule of Scope 1 and Scope 2 Location-Based Greenhouse Gas Emissions for the year ended December 31, 2020, in order for it to be in accordance with the Criteria.

April 7, 2022

Management's Schedule of the Subject Matter and Criteria:

HCA Healthcare, Inc.
 Schedule of Scope 1 and 2 Location-Based Greenhouse Gas Emissions
 For the Year Ended December 31, 2020
 Amounts in Metric Tonnes CO₂e

| Metric | Amount | Unit | Criteria |
|----------------------------------|---------------|---|--|
| Scope 1 Emissions | 729,952 | Metric tonnes of carbon dioxide equivalent ("mt CO ₂ e") | World Resources Institute (WRI)/World Business Council for Sustainable Development's (WBCSD) <i>The Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard, Revised Edition</i> (GHG Protocol) |
| Scope 2 Location-Based Emissions | 1,339,997 | mt CO ₂ e | WRI/WBCSD GHG Protocol |

Note 1 – Basis of Presentation:

The above amounts represent the Scope 1 and Scope 2 Location-Based Greenhouse Gas Emissions of HCA Healthcare, Inc. for the year ended December 31, 2020. These amounts have been prepared based on criteria established by the WRI/WBCSD GHG Protocol and an operational control boundary, excluding HCA's United Kingdom operations. Scope 1 emissions capture stationary combustion, mobile, and fugitive emissions (both refrigerants and anesthetics). Scope 2 emissions include purchased electricity consumption. Emissions are calculated based on actual utility and purchase data where available and extrapolated using spend and/or square footage data where actual data cannot be obtained. The following emission factor sources are referenced in the emission calculations:

| Metric | Sources of Emissions Factors |
|-----------------------------------|--|
| Scope 1 Emissions | UK Department for Environment Food & Rural Affairs IPCC AR 5 Australian DAWE American Chemical Society Washington State Legislature Jubilee Medical Centre EPA |
| Scope 2 Location- Based Emissions | The Emissions & Generation Resource Integrated Database 2019 |

Note 2 – Measurement Uncertainties:

Non-financial information is subject to measurement uncertainties resulting from limitations inherent in the nature and the methods used for determining such data. The selection of different but acceptable measurement techniques can result in materially different measurements. The precision of different measurement techniques may also vary.
